

A. HPE Aruba Trade-In Program

Within the framework of the HPE Aruba Trade-In Program End-User Customers can trade-in their used IT products against the purchase of an eligible Hewlett Packard Enterprise (HPE) Product (to be found on the web site [program start page](#)).

This Program applies indistinctly to purchases of eligible HPE Products made direct with HPE or indirectly with HPE authorized resellers.

The trade-in value though, only ensues if the equipment the participant wants to trade in is directly and verifiably connected to the purchase of the eligible HPE Product.

This is a like-for-like product trade-in only. The participant must purchase eligible HPE Products, and trade-in products of the same category type as the HPE Product to qualify.

The HPE Aruba Trade-In Program is hereafter referred to as "**Program**".

Participation in the program is consisting of 4 key steps.

- | The registration, to be completed by the seller of the HPE Products ("**Actor**"), followed by
- | the review and approval by HPE and finally, when the registration has been approved, the new products have been delivered,
- | the Trade-In claim can be finalized by the person or company
- | who receives the Trade-In refund ("**Participant**").

Participants

Only HPE or HPE authorized Resellers are allowed to initiate registrations for this Program.

The person or company registering to the Program is hereafter referred to as "**Actor**".

The Actor determines the beneficiary of the trade-in allowance payment. Either themselves or the End-User Customer who purchased the eligible HPE Products and returns the Trade-In Products against it.

The person or company receiving the trade-in allowance payment is hereafter referred to as "**Participant**".

Products

The eligible products sold to the End-User Customer are referred in the following as "**HPE Products**".

Only new HPE products are eligible to take part in the program. Demonstration products as well as remarketing or used products are excluded from the program.

The used products which are returned to HPE, are referred as "**Trade-in Products**".

The Trade-In Products must have been legally owned by the End-User Customer for at least 6 months.

The Program is valid in respect of HPE Products sold by either directly HPE or an HPE authorized Reseller to the End-User Customer.

The Program is not valid if the HPE Products are not owned by the Participant (for instance if the HPE Products are leased by the Participant).

The list of eligible products can be found on the [Eligible HPE products](#).

Trade-In Value Calculation

The calculation of refund amount is based on points assigned to the products.

For HPE Products and Return Products in the category Switching, Routing and Wireless Access Controller, points are equal to the number of functioning networking ports in each product.

For Transceivers 1 point is assigned per product, for DAC cables 2 points.

For HPE Products and Return Products in the Wireless Access Points and Access Controllers categories, points refer to the quantity of products.

To attain the maximum refund for each HPE Product, the points for the corresponding Trade-In Products must be equal to or greater than the points assigned to the HPE Product.

Trade-in Products with points greater than the points assigned to corresponding HPE Product(s) will be accepted for being traded in. However, no payment will exceed the maximum trade-in amount assigned to the corresponding HPE Products.

Trade-in Products that qualify for fewer points than are assigned to the corresponding HPE Product(s) will qualify for a pro rata trade-in amount.
